

Vedic Pac-Systems Installs & Commissions AZO equipment at IFFCO, Dubai.

Vedic Pac-Systems service team recently installed and commissioned **AZO equipment** at **IFFCO, Dubai** to the full satisfaction of the user. AZO supplied the DA 650 screener which is a combined dosing and screening system in hygienic design. The DA 650 is a compact unit that can fit into a very small area. The application was screening of seasoning powders with difficult & sticky flow characteristics.

AZO's DA type screeners are specially designed for food and Pharmaceutical industry to meet all Safety and Hygiene standards. The screener can be opened and assembled without any tools. The changeover is easy due to quick clamp arrangement in the screener offering flexibility for quick changeover and easy cleaning (after change of recipe). The screener has self-dosing screw which eliminates requirement of a separate dosing device thus saving space & cost.

The AZO Screener boasts of the lowest electricity consumption in the industry.

PREMIUM GERMAN TECHNOLOGY NOW ON A BUDGET

With increasing demand of premium products by the consumers, manufacturers are focusing on developing unique products and maintaining higher quality standards.

As premium quality products also require premium equipment to produce them, **Chocotech GmbH Germany**, unveils their latest development the **'SUCROBATCH'**.

The SUCROBATCH is a budget friendly batch cooker developed by Chocotech specially for the Indian market with interchangeable agitators and other modular options.

Chocotech has also designed a configurator for the cooker, which can navigate clients through the options, so a cooker in the correct execution can be chosen quickly.

LOMA INTRODUCES RUN WET MODELS.

With bacteria being a major issue for customers particularly within the wet food industry (meat, fish, dairy, ready meals, etc) and harsh, high pressure and temperature cleaning is often required. High care is also becoming increasingly important across other sectors of the food industry.

Loma (an ITW company), recently introduced **RUN WET** models of its Metal detector and **combination unit models** which are designed for harsh, high care environments.

The **CW3 RUN-WET® Checkweigher** and **CW3 RUN-WET® Combo System** models are rated to IP69K and offer a host of new features and smart design details to **keep factories running better**.

- Quicker and easier cleaning
- More productive operation
- Higher reliability
- Better compliance with food safety standards.
