

Rupshi: CARASTAR® and AUTOGRAV®. German Technology at it's best

CHOCOTECH: Spreading Sweetness in Bangladesh!

"Rupshi", one of the largest conglomerates in the textile sector of Bangladesh, recently stepped into confectionery industry with two world class plants from Chocotech GmbH of Germany, for the production of hard boiled candies & jelly. Chocotech GmbH established a new milestone with successful installation of the CARASTAR® and AUTOGRAV® systems.

CARASTAR® is a universal batch cooker designed for cooking all types of sugar masses such as toffee, hard boiled candy, caramel, binder, jelly, fillings, sugar solutions, etc. AUTOGRAV® is a batch weighing & preparation system for the precise metering and mixing of raw ingredients (sugar, water, glucose, milk etc.).

Plant was manufactured & delivered during the COVID period. It was installed and commissioned recently as a joint effort of the Rupshi Technical Team, CHOCOTECH technical team & engineers from **Vedic Pac Systems**.

Vedic Pac Systems has a team of qualified & trained engineers for quick support in the region.

AZO DA360, Amneal (Raks Pharma)

Vedic Pac Systems has successfully installed and commissioned the **AZO cyclone screener DA 360** at Amneal Pharma, an established company in Western India. Amneal manufactures active pharmaceutical ingredients (APIs) and intermediates for pharma facilities across the globe.

AZO's DA type of cyclone screener is used for safety screening and fractionating of material, for eliminating foreign matter, breaking lumps and for loosening the product. The special feature of this screener type is its inbuilt self dosing function, eliminating the use of an upstream dosing device, thus saving space & cost.

Cyclone screener DA advantages:

- Low construction height.
- No extra dosing device required.
- Completely extractable without tools, for quick & easy cleaning
- Drive with dosing screw demountable by snap locks, extraction device (opt.)
- Drive with screen can be extracted and swiveled
- Easy and fast inspection of screen basket
- Nickel chromium steel in different surface versions
- Self cleaning mesh
- Silent and dust free operation since there are no vibrating parts

The AZO screener boasts of the lowest power consumption and maintenance in the industry.

Are you ready for a screen test? Please write to azo@vedicsystems.com for additional information.

Vedic Pac Systems Engineers at Chocotech GmbH: Upskilling & Training overseas with the best.

Vedic Pac Systems has always taken pride in the fact that we supply the best in class equipment *made in Germany* (and Europe). We now take equal pride in the fact that our team of qualified engineers are *trained in Germany*. Vedic Pac Systems sent two engineers to Wernigerode for advanced technical training at Chocotech GmbH. CHOCOTECH set up a training program of 2 weeks for our engineers Kaushal Verma and Santosh Patil. This will enhance Vedic Pac Systems capability in providing on site services for commissioning in India, Bangladesh, Nepal & Sri Lanka, with a much quicker response time.
