Quality Assurance Advancements: Loma Systems' Metal Detector Enhances Safety at ITC

Loma Systems, UK via its long standing partner **Vedic Pac Systems** recently installed the IQ3+E Metal Detector at **ITC** in Jammu.

The Loma IQ3+E Metal Detector boasts several unique features such as:

1. Multilingual colour Touchscreen complete with Icon Driven Menu for easy operation
2. IP69K environmental protection (including liner and cover) suitable for both high-care and low-care environments
3. 70 Variable-frequency detection (31KHz to 882KHz)
4. Full range of aperture sizes to suit products being inspected
5. Multiple product memories for rapid product change over and data storage
6. Extensive data logging and reporting via USB or Ethernet for HACCP and retail compliance
7. Multilevel passwords protection provides secure access and are logged against events for traceability (CFR21 part11)

The metal detector will be used in the safety screening of candy and wafer chocolate rolls.

The skilled engineers from Vedic Pac Systems ensured seamless installation and commissioning of the metal detectors, meeting the customer's expectations with utmost satisfaction.

In addition, an Indigenous developed conveyor with reject mechanism was supplied by Vedic Pac Systems, effectively optimizing project costs while maintaining high industry quality standards. This integration underscores the commitment to cost efficiency without compromising on safety or quality.
