

Precision Coating in Action: Sollich Minicoater 420 Installed at VF Enterprise, Gujarat (a subsidiary of Balaji Wafers, Rajkot)

Vedic Pac Systems successfully installed a **Sollich Minicoater Type MC 420** at **VF Enterprise**, for development & pilot production of biscuits, cookies & wafers.

Minicoater Type MC 420 delivers exceptional performance in a compact footprint. Its programmable settings ensure consistently high product quality with the highest accuracy (tolerances) in the coating.

At the heart of this system is the integrated **Minitemper® Turbo**, a patented tempering system that guarantees: Perfect gloss, Good "snap" & Extended shelf life.

Key Features of the MiniCoater:

- Integrated *Minitemper® Turbo*: Advanced tempering technology for superior chocolate tempering.
- Precise Enrobing Control: Adjustable settings for optimal and repeatable enrobing results, scalable to the big machines.
- Hygienic Design: Stainless steel frame with smooth, gap free surfaces for easy cleaning.
- Integrated Sieving Station: Ensures consistent chocolate quality, free of foreign particles, with improved accessibility.
- User Friendly Interface: Advanced control system with a colour touch screen.
- Inbuilt chocolate tank fully temperature controlled for melting chocolate.
- Inbuilt chilling unit for chocolate tempering.
- Plug and play, with only power supply to be provided.
- Movable, as supplied with caster wheels.
- Can be integrated with online sprinkling and decorating unit from SOLLICH.

Installation and commissioning were successfully completed by qualified Vedic Pac Systems' engineers.

Food Safety with Loma IQ4H Head Metal Detector at Hyfun Foods

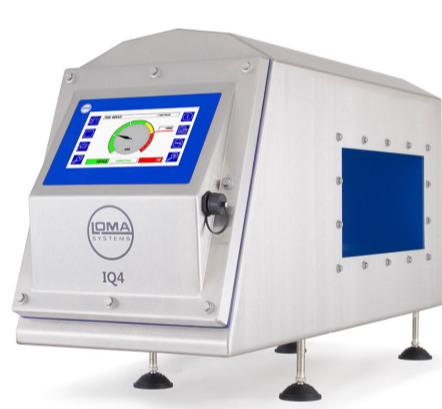

Vedic Pac Systems successfully installed and commissioned the **Loma IQ4H Metal Detector** at **Hyfun Foods (Asandas & Sons)**, Ahmedabad.

The metal inspection systems is installed for frozen food applications like French fries, Potato Croquettes etc. The *IQ4H* ensures *reliable detection of metal contaminants*, ensuring product safety and quality.

Key benefits:

- High sensitivity detection with variable frequency technology
- User friendly 7" touchscreen interface for easy operation
- Faster *Auto Learn* setup for improved efficiency
- Robust IP69 design for harsh processing environments
- Compliance with global food safety standards (IFS, BRC, FSMA)

Installation and commissioning were carried out by Vedic Pac Systems engineers.

Painting the town red: Paint India 2026

AZO is a global market leader in powder handling solutions, catering to over 82 industry segments. One of its key areas of expertise lies in the paint industry, where it offers advanced systems for efficient material handling. Its applications range from complete plant solutions for *water* based and *solvent* based paints to standalone screening systems for the epoxy powder sector.

Vedic Pac Systems recently participated in the Paint India Exhibition held in Mumbai, one of the premier shows for the paints, coatings, and chemical industries. The exhibition provided an excellent opportunity to connect with leading paint manufacturers and engage in discussions around ingredient automation and powder handling solutions offered by AZO.

AZO's *cutting edge* technology is designed to enhance operational efficiency, improve product quality and ensure seamless, dust-tight material flow in paint production processes.

Some highlights and memories from the exhibition...
