

## PFM Frozen Food Packaging Line Commissioned at Pagro Frozen Foods

Vedic Pac Systems has successfully installed and commissioned the **PFM MBP 24C2DMA Multihead Weigher** at **Pagro Frozen Foods Pvt. Ltd., Punjab.**

Plant has been commissioned for packing frozen vegetables such as green peas, sweet corn, carrots, broccoli, and potato-based products (French fries) in 500 g and 1000 g packs.

24C2DMA is a next-generation multihead weigher from PFM Group, designed to deliver exceptional speed, precision, and hygiene standards for modern frozen food operations. Its advanced DMA technology with Extended Precision Concept helps Pagro significantly reduce product giveaway, directly improving cost efficiency while ensuring precise weight control in every pack.

A central vibrating cone, with integrated load cell, ensures uniform product distribution across all channels, while the spring-less bucket system enhances reliability and reduces maintenance. Built without oxidizable or aluminium components with IP66 rating, the machine is ideal for demanding wash-down environments.

With CAN-Open network and EMI protection for stable high-speed communication, the system integrates seamlessly with PFM vertical form-fill-seal machines and tray sealers, optimizing overall line performance.

Installation was completed by **Vedic Pac Systems** engineers, with commissioning jointly done by PFM-MBP and Vedic Pac Systems ensuring smooth start-up and reliable performance.

## Seafood Leader to Confectionery Innovator: Gadre Marine & WDS

Vedic Pac Systems has successfully installed and commissioned a **WDS Lab Scale Jelly Mogul Line** with both starch and starch-less processing capabilities.

System is designed for mono, single-shot and triple-shot depositing of jelly products, offering high flexibility for R&D, pilot production, and new product development.

In addition to jelly applications, the same line is capable of depositing chocolates, providing versatility across confectionery categories.

A key advantage of this lab-scale solution is its scalability. Formulations and process developed on this system can be seamlessly replicated on full-scale production machines, enabling a smooth transition from product development to commercial manufacturing.

Installation and commissioning was done by engineers from Vedic Pac Systems.

## Screening to Precision Dosing: AZO at PLASTINDIA 2026

**AZO GmbH & Co. KG** participated in **PLASTINDIA 2026** alongside **Vedic Pac Systems Pvt. Ltd. (A Member of AZO Group)** as a co-exhibitor in the *German Pavilion* at Bharat Mandapam, New Delhi.

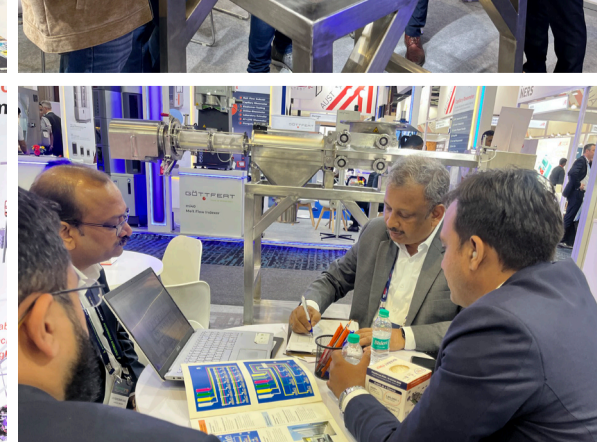

PLASTINDIA 2026, organized by Plast India Foundation in association with Messe Düsseldorf, is the largest exhibition serving the Indian and South Asian plastics industry.

In plastics processing, raw materials and additives frequently present difficult flow characteristics, making precise handling and dosing a critical requirement. Addressing these challenges, AZO presented its advanced solutions for ingredient automation and powder handling at the exhibition.

At our booth, the **AZO Screener Type DA 360** and the **AZO Dosing System Type AZODOS** were displayed, demonstrating reliable screening, precise dosing, and efficient material handling for complex bulk solids applications.

PlastIndia happens once in 3 years. The show & our stand witnessed strong engagement, leading to meaningful technical discussions and new industry insights.

Some memories from the show...
