

Collaboration, Excellence & Learning at AZO

Vedic Pac Systems Projects Team travelled to Germany to visit **AZO GmbH** and **AZO Liquids GmbH**, to participate in an enriching programme focused on knowledge sharing, project excellence, collaboration, and technical learning. Visit included participation in the *Corporate Projects & Measures Workshop* at AZO GmbH, bringing together colleagues from across the AZO Group. The workshop provided valuable insights into the Group's vision, strategy, priorities, and shared objectives, while fostering greater alignment and collaboration.

At AZO Liquids GmbH, our team participated in a *Train-the-Trainer* programme, combining in-depth theoretical learning with hands-on practical sessions. The programme offered valuable exposure to AZO's engineering expertise, plant capabilities, product technologies, and practical processes.

Purpose of the visit was to impart training from the very best in Germany, align our project team with established German practices in *tender management, design & engineering, procurement & project management*. It would ensure quicker response to market needs.

Strengthening Production at Haldiram, Nagpur with Three SOLLICH CONBAR Lines

Vedic Pac Systems successfully completed the installation and commissioning of two **SOLLICH CONBAR** lines at Haldiram, Nagpur, for the production of *Soan Papdi*.

SOLLICH

Having already installed one CONBAR line, which is in use for almost 3 years now, Haldiram went ahead with complete automation at their Nagpur facility. The facility now operates three **SOLLICH CONBAR** lines.

CONBAR key strengths are pressureless and accurate forming, helping to ensure gentle product handling and consistent quality. The system is also designed for reliable and economical operation, flexibility, easy operation, simple product changeovers, hygienic processing, and ease of maintenance. Conbar is a *universal* system that can be configured for different masses and can be integrated with other process stages, including dosing & mixing, product handling, and further downstream processing, depending on the application.

At Haldiram, the Conbar provided the following direct benefits.

1. Minimal touch points in production
2. Boosting the production many fold with the same manpower (operators)
3. Drastic reduction in footprint for the soan papdi forming area
4. Consistent & uniform product quality
5. Automation of all steps including slab forming, sprinkling & cutting
6. One plant can go as high as 3,000 kgs/h

Vedic Pac Systems engineers and Sollich provided complete support throughout the installation and commissioning process, along with hands-on training for Haldiram's team. The training covered machine operation, cleaning procedures, safety practices, routine maintenance and best operating practices to ensure efficient and reliable performance.

Vedic Pac Systems joins hands with TT of Italy for India & South Asia

Vedic Pac Systems is now the official partner for **TT of Italy**, for the Indian market, marking an important step in strengthening its presence and customer support across India.

With India continuing to be an important market for TT Italy, the new partnership brings together TT Italy's expertise in bakery processing technology and Vedic Pac Systems strong local presence in sales & marketing, services & after sales activities. The partnership is aimed at reinforcing TT Italy's market position in India and building stronger, long-term relationships with customers.
